### **ENCRYPT EMAIL: USING THE MIMECAST EMAIL FILTER TO AUTOMATICALLY ENCRYPT EMAIL WITH CONFIDENTIAL INFORMATION**

#### **Problem Description**

To maintain privacy regarding private and confidential information in email, it is necessary to encrypt email for outgoing email.

#### Resolution

Prepare the Confidential Attachment. The Mimecast Email Filter encrypts outgoing email based on a certain word in the subject field. The first step is to add the word "encrypt" to the subject field on your email. This word is the key to encryption, only email with the word "encrypt," will be encrypted. This only applies to email addresses and recipients outside of Towne Properties. Internal email does not leave our building, and it is not necessary to encrypt internal mail.
